

Paasche

HOUSEHOLD LACQUERING UNIT

"I bought an unpainted cabinet for almost nothing—and sprayed the lacquer on myself. My husband said furniture is finished this way in the factory—and this cabinet certainly looks fine finished this way."

Only
\$9.00

NOW— You Can Dress Up Your Own Furniture

HERE'S the new, easy way to spray light lacquers, paints, varnishes, enamels, shellacs and bronzes—in the home. Faster than a hand brush—does smoother, more even, and better work. Few women—or men for that matter—realize the importance of air-painting to industry. The finest furniture in the home—that gleaming new motor car—your grand piano—even your beads and jewelry—nearly everything you use and admire owes its beauty, and utility to the finish applied with Air-finishing Equipment.

Until now the home owner had to be content in applying the new colorful lacquers with a slow hand brush—with its laps, unsightly brush marks, and uneven coverage. For a long time, Paasche has felt that home owners would appreciate the advantages of air-painting. And so this low-priced Paasche Unit has been designed, tested, and perfected for air-painting anything about the home. Here it is—simplest and least

complicated, yet most efficient spraying outfit—designed by the manufacturer of the most complete line of air-finishing equipment in the world.

With this unit you can obtain beautiful results, always smooth and uniform—secure any shade—spray intricate pieces as easily as flat surfaces—produce rich blends, stipple effects and any finish—and as an aid in antiqueing furniture, this unit has no equal. It may also be used to spray germicides and to apply mothproofing materials to fabrics, furs, rugs, clothing, effecting big savings in the preservation and beautifying of home articles.

Few minutes of easy pumping gives enough air supply to paint a chair or bench. Simple and easy to operate—nothing to get out of order. Children get splendid results with it!

Manual training classes of high schools all over the country will find this inexpensive unit invaluable in teaching this latest air-finishing method.

Any article made more attractive with this unit.

"That two-color veiling effect in the center panel was easy to do—and the flower transfer quickly adds more beauty to this bench."

DISTRIBUTOR

Type JP Thumb-Action Fan Sprayer

Here's latest development of lowest priced adjustable fan sprayer in the Paasche Line. Attach it to your air supply and you apply all liquid materials easily and quickly. Thumb control is less convenient to handle than the LP easy pistol grip sprayer but on short jobs, it does the same work. Different size glass Mason jars, as listed, easily attached.

JP Sprayers with Glass Jar and Hose Coupling		Extra Jars Only
½ Pint	\$3.85	\$.10
1 Pint	4.00	.10
1 Quart	4.20	.15

Add desired length of air hose.

"My Paasche Unit enables me to lacquer my wicker furniture in two colors—more artistically than I ever could with a hand brush. And I keep the radiators looking new."

THIS new, compact airunit, low in price, furnishes a practical and efficient light portable unit with which a great variety of very attractive decorating, airpainting and finishing can be produced. For touchup, repainting, shading and lacquering most any article in the household or for light window trimming, or card and sign work, this unit is without an equal. Furniture stores, department stores as well as fixture and electrical stores can refinish marred or scratched articles, renewing their finish at a big saving.

Paasche low-pressure sprayers represent the latest development in low priced sprayers. They operate on low pressure from a few pounds and up with lowest air consumption.

The uniform fan spray, turns in any direction and is adjustable for small and large spray by simply turning aircap in for wide fast spray and out for smaller spray, patented clamtight cover and unbreakable metal cup, convenient pistol-grip and leak-proof valve make these FAN sprayers the finest and best obtainable—simple, strong and serviceable.

A used car dealer writes: "I find that I can save \$40 to \$60 repainting, lacquering or touching up my old cars and get a much better price after they are airfinished the Paasche way."

How to Order Order from your paint or hardware dealer. If he does not carry Paasche Household Lacquering Units in stock, he will be glad to obtain for you the Unit you select. Otherwise, order direct from the factory.

Paasche

Light Electric Portable Airpainting Unit

PLUG this Paasche Unit into any lamp socket and you're ready to paint with air—the modern way of lacquering and decorating YOUR OWN furniture and woodwork.

This Paasche Electric Unit may be used for interior shading, blending, decorating, and stenciling as well as for painting and lacquering jobs about the home. With it, you can accomplish original, amazing and almost magical results in decorative panels of webby, fairy-like stippling and veiling effects. Add a colored border and the dull, shabbiest piece of wood or metal article becomes bright, cheery and attractive.

It's so simple and easy for any one to

achieve truly artistic colorful blends with this Paasche Unit—"It's light enough to pick up and easy to carry by the handle." No experience is needed. No special skill. Just press gently on the trigger and you do finer, better work than you could ever do with a hand brush. Take those sturdy pieces of old furniture—too good to be thrown away—too unattractive to use—make them new and lovely again. Renew the beauty and usefulness of your porch and garden tables. Stencil and decorate your parlor curtains, waste baskets, bookends, magazine racks, etc. Transform your house thruout with warm, homelike colors—it's decidedly the vogue now—and you'll get a pleasant thrill in doing it.

Type UATP Lo-Hi Pressure Feed Airbrush

This is one of the famous Universal Paasche airbrushes.

It is easily controlled from a fine line to a wide fan spray.

It operates on lower and less pressure than any spraying device made—and saves its cost many times over. It has an operating lever that swings into 3 positions, thumb-action, finger-action or hand-action, providing unexcelled handiness and convenience. Very popular for light decorating and painting, and finishing small manufactured articles.

Operates on a small aircompressor, requiring only 1/2 to 2 cu. ft. of free air per minute at low airpressure, from 2 to 40 lbs.

UATPF2 Lo-Hi Pressure Multiplehead Airbrush with 1/2 pt. UAP Pressure Cup, complete as illustrated ready for use. \$23.85

By adding \$15.10 to price of above unit, this universal all-purpose airbrush will be included instead of the LP Sprayer listed above.
